

Fueling the Future

AFS Energy Systems Executive Leadership and Experience

John Mark Jay Doug

Mark T. Leach, President
A.A. Mechanical Engineering Technology

Mark T. Leach is a founding partner and company president, responsible for Engineering Design and Project Management. A native and resident of Harrisburg, Mark spent his entire professional career in the renewable energy and metal fabrication business. Since receiving his degree at Harrisburg Community College, he has been designing, installing and supporting biomass systems and engineering solutions.

Before founding AFS, Mark progressed from Mechanical Designer to Project Engineer to Product Manager and finally to Plant Manager for Saxton Air Systems – Energy Systems Division based in Harrisburg. Since 1990, Mark Leach has worked to make AFS Energy Systems one of the fastest growing and most successful renewable energy system companies in the United States. *You can reach Mark at mleach@AFSEnergy.com*

John A. Frailey P.E., Vice President – Engineering
B.S. Mechanical Engineering Professional Engineer Pennsylvania Reg.# PE-037927-E

John Frailey is also a founding partner as well as the vice president of engineering for AFS Energy Systems. John is responsible for the engineering design, service and support of all AFS wood-fired biomass systems. John also spent his entire career in the renewable energy field. Since receiving his BS in Mechanical Engineering degree at Auburn University, he has been designing and supporting renewable energy biomass systems throughout North America.

Before founding AFS, John worked as a project engineer and engineering manager at Saxton Air Systems – Energy Systems Division. Since 1990, John and his partners have established AFS Energy Systems one of the fastest growing and most successful renewable energy system companies in the United States. *You can reach John at jfrailey@AFSEnergy.com*

Fueling the Future

Jay Clark, Vice President – Sales
B.S. Business Administration

Jay Clark is the third founding partner of AFS Energy Systems. A Florida native, Jay received his degree and moved to Pennsylvania to build his career in biomass systems in 1981. Since then Jay has held various executive positions with Irvington-Moore (sales manager), Saxton Air Systems Inc. - Energy Systems Division (vice president, sales), American Wood Dryers, Inc. (sales manager), Automated Lumber Handling, Inc. (partner, vice president) and A.L.H. Properties, Inc. (partner, vice president).

Jay Clark manages all aspects of the day-to-day sales process for AFS. Jay and his national team of AFS sales representatives cover all of North America. His responsibilities include a thorough analysis of the perspective project site as well as the customer's needs and challenges. Then he works closely with the AFS engineering team to custom-design the optimal renewable energy solution. Jay's many years in the forest products industry also make him a valuable resource in assisting customers in finding fuel for their wood-fired energy system. *You can reach Jay at jclark@AFSEnergy.com*

Doug Fisher – Chief Operations Officer
M.S. Business Management; B.A. Speech Communications

Since April 2003, Doug Fisher has been the Chief Operations Officer for AFS, one of the nation's leading providers of metal fabrication and renewable energy biomass energy systems. Doug is a member of the senior management team at AFS and is responsible for all aspects of manufacturing, accounting, marketing, business development and safety.

Prior to AFS, Doug Fisher was the Vice President of Marketing and Internet Technology for BISYS, the nation's leading outsource solution provider for the Financial Services Industry. Doug was responsible for all aspects of Marketing and Internet strategy including: key client and financial analyst presentations, branding strategies, communications, public relations as well as Internet planning, development, implementation and sales.

Doug completed his Master of Management degree at Troy State University and received a Bachelor of Arts degree in Speech Communications from Penn State University.

He is a frequently invited speaker at industry events, conferences and graduate business schools to discuss renewable energy and business strategy. He has been a contributing journalist to NAILBA Technology Magazine and has been featured in Toastmaster Magazine. *Doug can be reached at dfisher@AFSEnergy.com*
